

**StorageVault Canada Inc.**  
**Consolidated Financial Statements**

For the Years ended December 31, 2013 and 2012

To the Shareholders of StorageVault Canada Inc.:

Management is responsible for the preparation and presentation of the accompanying consolidated financial statements, including responsibility for significant accounting judgments and estimates in accordance with International Financial Reporting Standards. This responsibility includes selecting appropriate accounting principles and methods, and making decisions affecting the measurement of transactions in which objective judgment is required.

In discharging its responsibilities for the integrity and fairness of the consolidated financial statements, management designs and maintains the necessary accounting systems and related internal controls to provide reasonable assurance that transactions are authorized, assets are safeguarded and financial records are properly maintained to provide reliable information for the preparation of financial statements.

The Board of Directors, acting through an Audit Committee composed primarily of directors who are neither management nor employees of the Corporation, is responsible for overseeing management in the performance of its financial reporting responsibilities, and for approving the financial information included in the annual report. The Board fulfils these responsibilities by reviewing the financial information prepared by management and discussing relevant matters with management and external auditors. The Board is also responsible for recommending the appointment of the Corporation's external auditors.

MNP LLP, an independent firm of Chartered Accountants, is appointed by the shareholders to audit the financial statements and report directly to them. Their report follows. The external auditors have full and free access to, and meet periodically and separately with, both the Audit Committee and management to discuss their audit findings.

## Independent Auditors' Report

To the Shareholders of StorageVault Canada Inc.:

We have audited the accompanying consolidated financial statements of StorageVault Canada Inc. and its subsidiaries, which comprise the consolidated statement of financial position as at December 31, 2013 and 2012, and the consolidated statement of income (loss) and comprehensive income (loss), changes in equity and cash flows for the years then ended, and a summary of significant accounting policies and other explanatory information.

### *Management's Responsibility for the Financial Statements*

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

### *Auditors' Responsibility*

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We conducted our audits in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained in our audits is sufficient and appropriate to provide a basis for our audit opinion.

### *Opinion*

In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of StorageVault Canada Inc. and its subsidiaries as at December 31, 2013 and 2012 and their financial performance and their cash flows for the years then ended in accordance with International Financial Reporting Standards.

## **StorageVault Canada Inc.**

### **Notes to the Consolidated Financial Statements**

For the Years Ended December 31, 2013 and 2012

---

#### **1. Description of Business**

The consolidated financial statements of StorageVault Canada Inc. and its subsidiaries (the "Corporation") as at and for the year ended December 31, 2013 were authorized for issuance by the Board of Directors of the Corporation on April 22, 2014. The Corporation is incorporated under the Business Corporations Act of Alberta and is domiciled in Canada. Its shares are publicly traded on the TSX Venture Exchange. The address of its registered office is 1000 – 250 2<sup>nd</sup> Street SW, Calgary, AB, T2P 0C1.

The Corporation's primary business is renting fixed and portable self storage units to residential and commercial customers in British Columbia, Alberta, Saskatchewan, Manitoba, and Ontario. The Corporation also actively seeks financially accretive properties in other Canadian locations in order to expand its network of portable storage units.

#### **2. Basis of Presentation**

These consolidated financial statements and the notes thereto present the Corporation's financial results of operations and financial position under International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") as at and for the year ended December 31, 2013, including 2012 comparative periods.

The consolidated financial statements have been prepared under the historical cost method, except for the revaluation of certain financial assets and financial liabilities to fair value. The consolidated financial statements were prepared on a going concern basis, and are presented in Canadian dollars, which is the Corporation's functional currency.

---

**StorageVault Canada Inc.**  
**Notes to the Consolidated Financial Statements**  
For the Years Ended December 31, 2013 and 2012

---

**3. Accounting policies**

*Basis of Consolidation*

The consolidated financial statements include the accounts of StorageVault Canada Inc. and the special purpose entity 1712066 Alberta Ltd., both of which are headquartered in Regina, SK. The financial statements for the special purpose entity are prepared for the same reporting period as StorageVault Canada Inc. using consistent accounting policies. All intercompany transactions and balances have been eliminated in the preparation of these consolidated financial statements.

As at December 31, 2012, the consolidated financial statements included the accounts of Southline Developments Ltd. On January 1, 2013, the operations and accounts of Southline Developments Ltd. were amalgamated with StorageVault Canada Inc., and the resulting entity carried on under the name StorageVault Canada Inc.

*Consolidated Entity*

StorageVault Canada Inc. established 1712066 Alberta Ltd. ("1712066") for the purpose of refinancing a mortgage on its Regina, SK property using a defeasance process. StorageVault Canada Inc. does not have any direct or indirect shareholdings in 1712066. An entity is consolidated if, based on an evaluation of the substance of its relationship with StorageVault Canada Inc. it is determined that StorageVault Canada Inc. has rights, either directly through ownership or indirectly through contractual arrangements, to direct the relevant activities of the other entity. 1712066 was established under terms that impose strict limitations on the decision making powers of its management and that result in StorageVault Canada Inc. receiving the majority of the benefits related to its operations and net assets, being exposed to the majority of the risks incident to its activities, and retaining the majority of the residual or ownership risks related to its assets.

*Revenue Recognition*

Revenue comprises all sales of goods and rendering of services at the fair value of consideration received or receivable after the deduction of any trade discounts and excluding sales taxes. Revenue is recognized when it can be measured reliably and the significant risks and rewards of ownership are transferred to the customer.

Storage units are rented to customers pursuant to rental agreements which provide for monthly rental terms with non-refundable rental payments. The rental agreements may be terminated by the customer without further obligation or cost upon vacating the storage unit. Revenue from rental agreements is recognized over the rental term pursuant to the rental agreement. Non-refundable customer deposits, which are received to hold a unit for rent at a future date, are deferred and recognized as revenue upon commencement of the rental agreement. Receipts of rental fees for future monthly periods are deferred and recognized as revenue when each respective monthly period commences. Provision is made for expected allowances as necessary.

---

## StorageVault Canada Inc.

### Notes to the Consolidated Financial Statements

For the Years Ended December 31, 2013 and 2012

---

#### Note 3 - Continued

Revenue from the sale of merchandise, including locks, boxes, packing supplies and equipment, is recognized when the merchandise is delivered to the customer. Management fee revenue is recognized in accordance with the substance of the relevant agreement. Revenue from investments is recognized when earned.

#### *Business Combinations*

All business combinations are accounted for by applying the acquisition method. On acquisition, the assets (including intangible assets), liabilities and contingent liabilities of an acquired entity are measured at their fair value. The Corporation recognizes intangible assets as part of business combinations at fair value at the date of acquisition. The determination of these fair values is based upon management's judgment and includes assumptions on the timing and amount of future incremental cash flows generated by the assets acquired and the selection of an appropriate cost of capital. The useful lives of intangible assets are estimated, and amortization charged on a straight-line basis. Acquisition costs are recognized in profit or loss as incurred.

Goodwill represents the excess of the cost of an acquisition over the fair value of the Corporation's share of the net assets/net liabilities of the acquired entity at the date of acquisition. If the cost of acquisition is less than the fair value of the Corporation's share of the net assets/net liabilities of the acquired entity (i.e. a discount on acquisition) the difference is credited to the Consolidated Statements of Income (Loss) and Comprehensive Income (Loss) in the period of acquisition. At the acquisition date, goodwill acquired is recognized as an asset and is allocated to each of the cash-generating units expected to benefit from the business combination's synergies and to the lowest level at which management monitors the goodwill. Goodwill is reviewed for impairment at least annually by assessing the recoverable amount of each cash-generating unit to which the goodwill relates. The recoverable amount is the higher of fair value less costs to sell, and value in use. When the recoverable amount of the cash-generating unit is less than the carrying amount, an impairment loss is recognized. Any impairment is recognized immediately in the Consolidated Statements of Income (Loss) and Comprehensive Income (Loss) and is not subsequently reversed.

#### *Significant Accounting Estimates and Judgments*

The preparation of the consolidated financial statements requires management to make judgments, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making judgments about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates. The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

---

## StorageVault Canada Inc.

### Notes to the Consolidated Financial Statements

For the Years Ended December 31, 2013 and 2012

---

#### Note 3 - Continued

Estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year include, but are not necessarily limited to:

- Property, plant and equipment – The Corporation determines the carrying value of its property, plant and equipment based on policies that incorporate estimates, assumptions and judgments relative to the useful lives and residual values of the assets. Estimates of future cash flows are based on the most recent available market and operating data at the time the estimate is made.
- Purchase price allocations – Estimates are made in determining the fair value of assets and liabilities, including the valuation of separately identifiable intangibles acquired as part of an acquisition. These estimates may be further based on management's best assessment of the related inputs used in valuation models, such as future cash flows and discount rates.
- Bad debts – The Corporation estimates potential bad debts based on an analysis of historical collection activity and specific identification of overdue accounts. Actual bad debts may differ from estimates made.
- Income taxes - Income taxes are subject to measurement uncertainty due to the possibility of changes in tax legislation or changes in the characterization of income sources.
- Compound financial instruments – Certain compound financial instruments contain both a liability component and an equity component pursuant to IFRS. The determination of the amount attributable to each component is subject to assumptions made, and valuation models used, at the time the financial instrument is issued.
- Stock based compensation – Compensation costs accrued for stock based compensation plans are subject to the estimation of the ultimate payout using pricing models such as the Black-Scholes model which is based on significant assumptions such as volatility, dividend yield and expected term.

Management judgments that may affect reported amounts of assets and liabilities, income and expenses include but are not necessarily limited to:

- For the purpose of assessing impairment of tangible and intangible assets, assets are grouped at the lowest level of separately identified cash flows which make up the Cash Generating Unit ("CGU"). Determination of what constitutes a CGU is subject to management judgment. The asset composition of the CGU can directly impact the recoverability of the assets included within the CGU.
- The determination of which entities constitute an SPE for the purpose of consolidation is subject to management judgment regarding levels of control, assumptions of risk and other factors that may ultimately include or exclude an entity from the classification of an SPE.
- For the purpose of recording asset acquisitions, management must exercise judgment to determine if the acquisition meets the definition of a Business Combination. Such determination may affect the recorded amounts of specific assets and liabilities, goodwill and/or transaction costs.

#### *Cash and Short Term Deposits*

Cash and short term deposits on the Consolidated Statement of Financial Position is comprised of cash at bank and on hand, and short term, highly liquid deposits with an original maturity of 3 months or less. For the purpose of the Consolidated Statements of Cash Flows, cash and short term deposits is as defined above, net of outstanding bank overdrafts, except where no right of set-off exists.

---

**StorageVault Canada Inc.**  
**Notes to the Consolidated Financial Statements**  
For the Years Ended December 31, 2013 and 2012

---

**Note 3 - Continued**

*Short Term Investments and Long Term Investments*

Short term investments and long term investments consist of Government of Canada bonds with maturities greater than three months.

*Inventory*

Inventories are valued at the lower of cost and net realizable value. Cost, where appropriate, is determined using the first-in first-out method.

*Property, Plant and Equipment*

Property, plant and equipment are stated at historical cost less accumulated amortization and any impairment in value. Historical cost includes expenditures that are directly attributable to the acquisition of the items. Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Corporation and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognized. All other repairs and maintenance are charged to the Consolidated Statements of Income (Loss) and Comprehensive Income (Loss) during the financial period in which they are incurred. Once an asset is available for use in the location and condition intended by management, it is amortized to its residual value using the appropriate amortization rate set forth by management. Amortization is calculated using the declining balance method to allocate the cost of property, plant and equipment to their residual values over their estimated useful lives, as follows:

Buildings	4%
Leasehold improvements	20%
Vehicles	30% to 45%
Truck decks and cranes	20%
Storage containers	30%
Fences and parking lots	8%
Furniture and equipment	20%
Computer equipment	45%

Land is not amortized.

The residual value and useful lives of property, plant and equipment are reviewed, and adjusted if appropriate, at each Consolidated Statements of Financial Position date. An asset's carrying value is written down to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount. These impairment losses are recognized in the Consolidated Statements of Income (Loss) and Comprehensive Income (Loss). Following the recognition of an impairment loss, the amortization charge applicable to the asset is adjusted prospectively in order to systematically allocate the revised carrying amount, net of any residual value, over the remaining useful life.

---

## StorageVault Canada Inc.

### Notes to the Consolidated Financial Statements

For the Years Ended December 31, 2013 and 2012

---

#### Note 3 - Continued

##### *Goodwill and Other Intangible Assets*

Goodwill represents the excess of the cost of an acquisition over the fair value of the identifiable assets and liabilities of the acquiree at the date of acquisition. Goodwill is tested for impairment on an annual basis and is carried at cost less accumulated impairment losses. Impairment losses on goodwill are not reversed. Goodwill is allocated to cash generating units for the purpose of impairment testing. The allocation is made to those cash generating units or groups of cash generating units that are expected to benefit from the business combination in which the goodwill arose.

Other intangible assets are carried at cost less accumulated amortization and accumulated impairment losses. Amortization begins when an asset is available for use and is calculated on a straight-line basis to allocate the cost of assets over their estimated useful lives as follows: Franchise Agreements - 10 years; Tennant Relationships - 15 months; Website Development Costs - 12 months. The cost of intangible assets acquired in a business combination is the fair value at acquisition date.

##### *Leases*

A lease is defined as an agreement whereby the lessor conveys to the lessee, in return for a payment or a series of payments, the right to use a specific asset for an agreed period of time. Where the Corporation is a lessee and has substantially all the risks and rewards of ownership of an asset, the arrangement is considered a finance lease. Finance leases are recognized as assets of the Corporation within property, plant and equipment at the inception of the lease at the lower of fair value and the present value of the minimum lease payments. Assets held under finance leases are amortized on a basis consistent with similar owned assets. Payments made under finance leases are apportioned between capital repayments and interest expense charged to the Consolidated Statements of Income (Loss) and Comprehensive Income (Loss). Other leases where the Corporation is a lessee are treated as operating leases. Payments made under operating leases are recognized in the Consolidated Statements of Income (Loss) and Comprehensive Income (Loss) on a straight-line basis over the term of the lease.

Where the Corporation is a lessor and has transferred substantially all the risks and rewards of ownership of an asset to a lessee, the arrangement is considered a finance lease. For finance leases, capital amounts due from lessees are recognized as financial assets of the Corporation within trade and other receivables at the inception of the lease at the amount of the net investment in the lease after making provision for bad and doubtful debts. Payments received under finance leases are apportioned between capital repayments and interest income credited to the Consolidated Statements of Income (Loss) and Comprehensive Income (Loss). Other leases where the Corporation is a lessor are treated as operating leases. For operating leases, the asset is capitalized within property, plant and equipment and amortized over its useful economic life. Payments received under operating leases are recognized in the Consolidated Statements of Income (Loss) and Comprehensive Income (Loss) on a straight-line basis over the term of the lease.

---

## StorageVault Canada Inc.

### Notes to the Consolidated Financial Statements

For the Years Ended December 31, 2013 and 2012

---

#### Note 3 - Continued

##### *Impairment of Non-Financial Assets*

The carrying values of all non-current assets are reviewed for impairment when events or changes in circumstances indicate that their carrying amounts may not be recoverable. Additionally, goodwill and intangible assets with indefinite useful lives are tested for impairment annually. An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. Any provision for impairment is charged to the Consolidated Statement of Income (Loss) and Comprehensive Income (Loss) in the year concerned. Impairments of goodwill are not reversed. Impairment losses on other non-current assets are only reversed if there has been a change in estimates used to determine recoverable amounts and only to the extent that the revised recoverable amounts do not exceed the carrying values that would have existed, net of depreciation or amortization, had no impairments been recognized.

##### *Income Taxes*

Income tax is comprised of current tax and deferred tax. Income tax is recognized in the Consolidated Statements of Income (Loss) and Comprehensive Income (Loss) except to the extent that it relates to items recognized directly in equity, in which case it is recognized in equity.

Current tax is the tax expected to be payable on the taxable income for the year, using tax rates enacted or substantively enacted at the reporting date, and any adjustment to tax payable in respect of previous years.

Deferred tax is recognized using the liability method, providing for temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is not recognized on the initial recognition of assets or liabilities in a transaction that is not a business combination. In addition, deferred tax is not recognized for taxable temporary differences arising on the initial recognition of goodwill. Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the reporting date. Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset, and they relate to income taxes levied by the same tax authority on the same taxable entity, or on different tax entities, but they intend to settle current tax liabilities and assets on a net basis or their tax assets and liabilities will be realized simultaneously.

A deferred tax asset is recognized to the extent that it is probable that future taxable profits will be available against which the temporary difference can be utilized. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

##### *Comprehensive Income (Loss)*

Comprehensive income is defined as the change in equity from transactions and other events and circumstances from non-owner sources. "Other comprehensive income" ("OCI") refers to items recognized in comprehensive income but that are excluded from net income. For the year ended December 31, 2013 there was no other comprehensive income item, nor is there any accumulated balance of other comprehensive income.

#### Note 3 - Continued

##### *Stock Based Compensation*

The fair value of stock options issued to directors and consultants under the Corporation's stock option plan is estimated at the date of issue using the Black-Scholes option pricing model, and charged to operations and contributed surplus. Each tranche in an award is considered a separate award with its own vesting period and grant date fair value. On the exercise of options, the cash consideration received and the fair value of the option previously credited to contributed surplus are credited to share capital.

The fair value of agent options issued to advisors in conjunction with financing transactions is estimated at the date of issue using the Black-Scholes option pricing model, and charged to share capital and contributed surplus over the vesting period. On the exercise of agent options, the cash consideration received and the fair value of the option previously credited to contributed surplus are credited to share capital.

Where stock options are cancelled, it is treated as if the stock options had vested on the date of cancellation and any expense not yet recognized for the award is recognized immediately. However, if a new option is substituted for the cancelled option and is designated as a replacement option on the date that it is granted, the cancelled and the new options are treated as if they were a modification of the original option.

Option pricing models require the input of highly subjective assumptions, including the expected price volatility. Changes in these assumptions can materially affect the fair value estimate and, therefore, the existing models do not necessarily provide a reliable single measure of the fair value of the Corporation's share purchase options. Forfeitures are estimated for each reporting period and adjusted as required to reflect actual forfeitures that have occurred in the period.

##### *Loss per Share*

Basic earnings per common share is computed by dividing the net earnings by the weighted average number of common shares outstanding during the period. Diluted net earnings per share is calculated by dividing the net earnings by the weighted average number of shares outstanding as adjusted for the potential dilution that would occur if outstanding stock options, subordinated debentures, preferred shares or other potentially dilutive financial instruments were exercised or converted to common shares. The weighted average number of diluted shares is calculated in accordance with the treasury stock method. The treasury stock method assumes that the proceeds received from the exercise of all potentially dilutive instruments are used to repurchase common shares at the average market price.

##### *Share Capital*

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of shares are shown in equity as a deduction from the proceeds received.

### Notes to the Consolidated Financial Statements

For the Years Ended December 31, 2013 and 2012

---

#### Note 3 - Continued

##### *Segment Reporting*

An operating segment is a component of the Corporation that engages in business activities from which it may earn revenues and incur expenses. All operating segments' operating results are reviewed regularly by the Corporation's CEO in order to make decisions regarding the allocation of resources to the segment. Segment results include items directly attributable to a segment as well as those that can be allocated on a reasonable basis.

##### *Financial Instruments*

Financial assets can be classified as "fair value through profit or loss" ("FVTPL"), "loans and receivables", "available-for-sale" or "held-to-maturity". Financial liabilities can be classified as FVTPL or "other financial liabilities".

All financial instruments are measured at fair value plus transaction costs on initial recognition of the instrument with the exception of financial instruments classified at FVTPL, which are measured at fair value and any associated transaction costs are expensed as incurred.

Financial assets and liabilities are offset and the net amount is presented in the Consolidated Statements of Financial Position when, and only when, the Corporation has a legal right to offset the amounts and intends either to settle on a net basis or to realize the asset and settle the liability simultaneously.

The effective interest method is used for financial instruments measured at amortized cost and allocates interest over the relevant period. The effective interest rate is the rate that discounts estimated future cash flows (including all fees paid or received that form an integral part of the effective interest rate, transaction costs and other premiums and discounts) through the expected life of the instrument, to the net carrying amount on initial recognition.

##### Financial assets at FVTPL

Financial assets are classified as FVTPL when acquired principally for the purpose of trading, if so designated by management, or if they are derivative assets. Financial assets classified as FVTPL are measured at fair value, with changes recognized in the Consolidated Statements of Income (Loss) and Comprehensive Income (Loss).

The Corporation's FVTPL assets consist of cash and short term deposits.

##### Loans and receivables

Trade receivables, loans and other receivables that have fixed or determinable payments that are not quoted in an active market are classified as loans and receivables. Such assets are recognized initially at fair value plus any directly attributable transaction costs. Subsequent to initial recognition loans and receivables are measured at amortized cost using the effective interest method, less any impairment losses.

The Corporation's loans and receivables consist of accounts receivable.

---

## StorageVault Canada Inc.

### Notes to the Consolidated Financial Statements

For the Years Ended December 31, 2013 and 2012

---

#### Note 3 - Continued

##### Available for sale financial assets

Available for sale financial assets are non-derivative financial assets that are designated as available for sale and that are not classified in any other category. Subsequent to initial recognition, they are measured at fair value and changes therein, other than impairment losses, are recognized in other comprehensive income and presented within equity in the fair value reserve. When an available for sale financial asset is derecognized, the cumulative gain or loss in other comprehensive income is transferred to profit or loss.

The Corporation currently has no assets which are designated as available for sale.

##### Held to maturity financial assets

If the Corporation has the positive intent and ability to hold certain financial assets to maturity, then such financial assets are classified as held to maturity. Held to maturity financial assets are recognized initially at fair value plus any directly attributable transaction costs. Subsequent to initial recognition they are measured at amortized cost using the effective interest method, less any impairment losses.

The Corporation's held to maturity financial assets consist of short term investments and long term investments. These investments are comprised of Government of Canada bonds and cash substituted for mortgage security under defeasance arrangements.

##### Financial liabilities at FVTPL

Financial assets are classified as FVTPL if they are designated as such by management, or they are derivatives. Financial liabilities classified as FVTPL are measured at fair value, with changes recognized in the Consolidated Statements of Income (Loss) and Comprehensive Income (Loss).

The Corporation's financial liabilities at FVTPL consists of preferred shares.

##### Other financial liabilities

Other financial liabilities are financial liabilities that are not classified as FVTPL. Such financial liabilities are recognized initially at fair value plus any directly attributable transaction costs. Subsequent to initial recognition, other financial liabilities are measured at amortized cost using the effective interest method. Financing fees and other costs incurred in connection with debt financing are deducted from the cost of the debt and amortized using the effective interest method.

The Corporation's other financial liabilities consist of accounts payable and accrued liabilities, and long term debt.

Unless otherwise noted, it is management's opinion that the Corporation is not exposed to significant interest, currency or credit risks arising from these financial instruments. The fair value of these financial instruments approximates their carrying values, unless otherwise noted.

**Note 3 - Continued**

*Adopted and Future Accounting Policies*

On January 1, 2013, the Corporation adopted the following new accounting standards that were previously issued by the International Accounting Standards Board (the "IASB").

IFRS 10: Consolidated Financial Statements ("IFRS 10")

IFRS 10 replaces the portion of IAS 27 Consolidated and Separate Financial Statements that addresses the accounting for consolidated financial statements. IFRS 10 establishes a single control model that applies to all entities including special purpose entities. The changes introduced by IFRS 10 require management to exercise significant judgment to determine which entities are controlled, and therefore, are required to be consolidated by a parent entity. No changes to the consolidated financial statements arose as a result of the adoption of this standard.

IFRS 11: Joint Arrangements ("IFRS 11")

IFRS 11 requires a venture to classify its interest in a joint arrangement as a joint venture or a joint operation. Joint ventures will be accounted for using the equity method of accounting, whereas for a joint operation, the venture will recognize its share of the assets, liabilities, revenue and expenses of the joint operation. Under previous IFRS, entities have the choice to proportionately consolidate or equity account for interests in joint ventures. Adoption of this IFRS standard did not result in adjustments to the Corporation's consolidated financial statements.

IFRS 12: Disclosure of Interests in Other Entities ("IFRS 12")

IFRS 12 establishes disclosure requirements for interests in other entities, such as subsidiaries, joint arrangements, associates, and unconsolidated structured entities. The standard carries forward existing disclosures and also introduces significant additional disclosures that address the nature of, and risks associated with an entity's interest in other entities. Adoption of this IFRS standard did not result in adjustments to the Corporation's consolidated financial statements.

IFRS 13: Fair Value Measurement ("IFRS 13")

IFRS 13 is a comprehensive standard for fair value measurement and disclosure of fair value measurements across various IFRS standards. IFRS 13 does not change when an entity is required to use fair value, but rather provides guidance on how to measure fair value under IFRS when fair value is required or permitted. The new standard expands the disclosure requirements in respect of fair value measurement such that financial statements in the future will require an analysis of the fair value hierarchy for financial instruments, information about the sensitivity of fair market value measurements to changes in unobservable estimation inputs, detailed commentaries on the valuation methods, as well as other disclosures. The change had no significant impact on the measurements of the Corporation's assets and liabilities.

IAS 28: Investments in Associates and Joint Venturers ("IAS 28")

IAS 28 prescribes the accounting for investments in associates and sets out the requirements for the application of the equity method when accounting for investments in associates and joint ventures. No changes to the consolidated financial statements arose as a result of the adoption of this standard.

### Notes to the Consolidated Financial Statements

For the Years Ended December 31, 2012 and 2011

---

#### Note 3 - Continued

New or amended applicable accounting standards that have been previously issued by the IASB but are not yet effective, and have not been applied by the Corporation, are as follows:

#### IFRS 7: Financial instruments: disclosures and IAS 32: Financial instruments: presentation

Financial assets and financial liabilities may be offset, with the net amount presented in the statement of financial position, only when there is a legally enforceable right to set off and when there is either an intention to settle on a net basis or to realize the asset and settle the liability simultaneously. The amendments to IAS 32, issued in December 2011, clarify the meaning of the offsetting criterion "currently has a legally enforceable right to set off" and the principle behind net settlement, including identifying when some gross settlement systems may be considered equivalent to net settlement. The Corporation intends to adopt these amendments in its consolidated financial statements for the year commencing January 1, 2014. The Corporation does not expect the amendments to have a material impact on the consolidated financial statements.

#### IFRS 8: Operating segments

The amendments to IFRS 8, issued in December 2013, require an entity to disclose the judgments made by management in applying the aggregation criteria for reportable segments. The amendments will only affect disclosure and are effective for annual periods beginning on or after July 1, 2014.

#### IFRS 9: Financial Instruments: Classification and Measurement ("IFRS 9")

IFRS 9 was issued in November 2009 and subsequently amended as part of an ongoing project to replace IAS 39 *Financial instruments: Recognition and measurement*. The standard requires the classification of financial assets into two measurement categories based on the entity's business model for managing its financial instruments and the contractual cash flow characteristics of the instrument. The two categories are those measured at fair value and those measured at amortized cost. The classification and measurement of financial liabilities is primarily unchanged from IAS 39. However, for financial liabilities measured at fair value, changes in the fair value attributable to changes in an entity's "own credit risk" is now recognized in other comprehensive income instead of in profit or loss. This new standard will also impact disclosures provided under IFRS 7 *Financial instruments: disclosures*. The IASB has removed the previously proposed January 1, 2015 mandatory effective date. The IASB will decide on a new effective date when the entire IFRS 9 project is closer to completion. The Corporation is currently evaluating the impact of this new standard.

#### IAS 36: Impairment of assets

The amendments to IAS 36, issued in May 2013, require:

- Disclosure of the recoverable amount of impaired assets; and
- Additional disclosures about the measurement of the recoverable amount when the recoverable amount is based on fair value less costs of disposal, including the discount rate when a present value technique is used to measure the recoverable amount.

The amendments will only affect disclosure and are effective for annual periods beginning on or after January 1, 2014.

#### 4. Restatement of Presentation of Preferred Shares

During the preparation of the financial statements for the year ended December 31, 2013, the Corporation determined that the presentation of its issued preferred shares did not reflect the proper allocation of the transaction price between liabilities and equity pursuant to the methodology outlined in *IAS 39 Financial Instruments: Recognition and Measurement*. Previously, the preferred shares were bifurcated between equity related to a conversion feature in the shares, and a liability component related to the cash flows and a retraction feature in the shares. Due to a down-round component in the conversion feature, it was determined that the proper treatment is to reflect the conversion feature as a financial liability. The Corporation has restated the prior periods in accordance with *IAS 8 – Accounting Policies, Changes in Accounting Estimates and Errors*.

The impact of this restatement to the financial statements is as follows:

	January 1, 2012 Opening Balances			December 31, 2012 Ending Balances		
	Previously Reported	Change	Adjusted Balance	Previously Reported	Change	Adjusted Balance
<b><u>Consolidated Statements of Financial Position</u></b>

#### 5. Acquisitions

On March 27, 2013, the Corporation completed the acquisition from an arm's length vendor of the assets and operations of Airport Road Self Storage located in London, Ontario. The facility has approximately 50,000 square feet of rentable self-storage space with outdoor space for storage of vehicles. StorageVault intends to develop and operate a PUPS portable storage business in London in conjunction with the acquisition of the self-storage facility.

A summary of the assets acquired and liabilities assumed using the acquisition method of accounting is as follows:

Land	272,000
Buildings	2,150,000
Vehicles and equipment	10,193
Goodwill	142,807
Net Assets Acquired	<u>2,575,000</u>

In addition to the above, the Corporation paid and capitalized \$34,805 in land transfer taxes to complete this acquisition.

Consideration paid for the net assets acquired was obtained from the following:

Proceeds from first mortgage on the property	2,575,000
	<u>2,575,000</u>

Selected information for the acquisition, since its acquisition date:

Revenue	230,813
Operating costs	118,755
Amortization	44,818
Interest	80,050
Net income (loss)	<u>(12,810)</u>

Had the acquisition occurred on January 1, 2013, there would have been an insignificant incremental impact on the Corporation's revenues and net earnings.

**6. Cash and Short Term Deposits**

Cash represents balances on deposit at a Canadian Chartered Bank. These balances earn interest at Bank Prime less 2.25% when a minimum balance of \$100,000 is maintained. Term deposits, when used, are short term, highly liquid deposits with an original maturity of 3 months or less.

Restricted cash for the purposes of securing operating letters of credit and corporate credit card lines as at December 31, 2013 was \$nil (December 31, 2012 - \$69,702).

**Notes to the Consolidated Financial Statements**  
For the Years Ended December 31, 2013 and 2012

---

**Note 10 - Continued**

The bank Prime rate at December 31, 2013 was 3.00% (December 31, 2012 - 3.00%). The BDC Floating Base rate at December 31, 2013 was 5.00% (December 31, 2012 - 5.00%).

Term debt is secured by a charge against specific assets. Mortgages are secured by a first charge on the properties of the Corporation. The defeasance obligation is secured by Government of Canada bonds recorded as Short Term Investments and Long Term Investments (see Note 7).

The deferred financing costs are made up of fees and costs incurred to obtain the related mortgage financing, less accumulated amortization.

In the fiscal year 2012, the Corporation completed the defeasance of a mortgage on the Trans Can property in Regina (the "Defeasance Obligation"). The result was a defeasance obligation (liability) of \$1,789,785 at December 31, 2012 being the present value of the remaining payments under the original mortgage at an effective interest rate of 1.09%. The payments will be fully funded by the principal and interest earnings of Short and Long Term Investments of \$1,764,247 in Government of Canada Bonds bearing interest rates ranging from 1.75% and 3.50% and maturities ranging from March 2013 to June 2016. Both the defeasance obligation and the Short and Long Term Investments are held within 1712066 Alberta Ltd, an entity whose financial statements are consolidated with those of StorageVault Canada Inc.

On July 26, 2013, the Corporation completed the redemption of 100% of the 9.5% convertible debentures originally issued in May, 2009 and originally due in May, 2014, by paying \$320,000, plus accrued interest to the date of redemption. The redemption was financed by drawing upon existing credit facilities with an interest rate presently at 4.00%

In 2012, the Corporation negotiated a committed credit facility with a major financial institution. The facility consists of three segments:

1. Facility 1: authorized up to \$20,000,000 for the acquisition and / or refinancing of self-storage and PUPS portable storage facilities. As at December 31, 2013, the Corporation had assets with a total book value of \$8,225,611 (December 31, 2012 - \$2,748,698) pledged to this segment. As at December 31, 2013, the Corporation had drawn \$7,810,197 (December 31, 2012 - \$2,691,994) on this segment and, based on a percentage of the appraised value of the assets pledged to date, \$2,491,653 remains available to be drawn.
  2. Facility 2: authorized up to \$2,000,000 for the acquisition of PUPS portable storage containers. As at December 31, 2013, the Corporation had drawn \$528,469 (December 31, 2012 - \$100,308) on this segment.
  3. Facility 3: authorized up to \$1,000,000 for the acquisition of other capital assets used in connection with the Corporation's activities. As at December 31, 2013, the Corporation had drawn \$500,719 (December 31, 2012 - \$nil) on this segment.

---

**Note 10 - Continued**

The interest rate on each of the segments above is bank prime plus 1.00% or Bankers' Acceptance rate plus 2.75%. Funding is secured by first mortgage charges on fixed and portable storage properties and assets. The Corporation must maintain certain financial ratios to comply with the facilities. These covenants include a fixed charge coverage ratio, a tangible net worth ratio, and a loan to value ratio. The Corporation is also subject to a bank covenant ratio of total debt to tangible net worth. As of December 31, 2013, the Corporation is in compliance with all covenants.

In addition to the first charge on related land and property under mortgages noted above, long term debt is secured by general security agreements covering all assets of the Corporation, general assignment of rents and leases and assignments of insurance coverage over all assets of the Corporation.

Principal repayments on long-term debt in each of the next five years are estimated as follows:

2014	1,043,962
2015	1,055,721
2016	2,387,604
2017	960,376
2018	878,097

**11. Preferred Shares**

	<u>Number of Shares</u>	<u>Amount</u>
		<i>Restated-Note 4</i>
Balance, December 31, 2011	4,148,172	4,148,172
Stock dividends paid	104,681	104,681
Balance, December 31, 2012	<u>4,252,853</u>	<u>4,252,853</u>
Stock dividends paid	107,322	107,322
Balance, December 31, 2013	<u><u>4,360,175</u></u>	<u><u>4,360,175</u></u>

Two investment funds managed by PFM Capital Inc. of Regina, SK (the "Investor") committed to make a \$4,000,000 preferred share investment in the Corporation. The preferred share financing was drawn down by the Corporation in two tranches of \$2 million each with the first tranche drawn on the closing date of March 17, 2010 and the second tranche drawn on October 15, 2010.

The preferred shares pay a fixed-rate cumulative dividend of 5% per year payable as follows: i) 2.5% in cash payable quarterly, in arrears, from each respective drawdown date, calculated for the immediately preceding period, and; ii) 2.5% in preferred shares, credited quarterly, in arrears from each respective drawdown date, calculated for the immediately preceding period.

## StorageVault Canada Inc.

### Notes to the Consolidated Financial Statements

For the Years Ended December 31, 2013 and 2012

---

#### Note 11 - Continued

The preferred shares are convertible at the Investor's option into common shares of the Corporation for a period of three years from each respective drawdown date at a conversion price of \$0.30 and are retractable by the Investor after the third anniversary of each respective drawdown date at the face value of the preferred shares. The preferred shares are redeemable by the Corporation any time after the fourth anniversary of each respective drawdown date.

Effective December 27, 2012, the shareholders and the Investor agreed to amend the features such that the shares were convertible for a period of four years and are retractable by the Investor after the fourth anniversary of each respective drawdown date and were redeemable by the Corporation any time after the fifth anniversary of each respective drawdown date. Effective December 30, 2013, the shareholders and the Investor agreed to again amend the features such that the shares are convertible for a period of five years and are retractable by the Investor after the fifth anniversary of each respective drawdown date and were redeemable by the Corporation any time after the sixth anniversary of each respective drawdown date.

In addition, the preferred shares contain a price protection feature in the form of a down-round provision (the "Down-Round Provision"), which provides for the downward adjustment to the conversion exercise price in the event the Corporation completes a financing, or financings, of equity securities at a price lower than \$0.30 per equity security, provided that the lower limit of such downward adjustment shall be no lower than \$0.19. As a consequence of the Down-Round Provision, the conversion option is considered an embedded derivative liability, as the number of common shares that could be issued on conversion is variable.

The preferred shares contain two components, being the debt component and an embedded derivative liability component arising from the Investor's right to convert. The Corporation has elected to treat these two components as one financial instrument measured at fair value through profit and loss. The preferred shares are therefore presented as a liability at fair value in the consolidated financial statements. As the preferred shares are entirely held by a party related to the Corporation, an option pricing model was not considered appropriate for valuing the preferred shares and conversion option. Rather, the transaction price was considered by management to be a more reliable estimate of fair value. The carrying value of the preferred share liability at December 31 2011, 2012 and 2013 represents the estimated fair value of the outstanding preferred shares, including the conversion, retraction, redemption and Down-Round Provision features.

Transaction costs attributable to the preferred shares in the amount of \$36,151 were charged when incurred to profit or loss.

**14. Financial Risk Management and Fair Value**

The Corporation is required to disclose certain information concerning its financial instruments, which are defined as contractual rights to receive or deliver cash or other financial assets. The fair values of the Corporation's cash and short term deposits, accounts receivable, and accounts payable and accrued liabilities approximate their carrying amount because of short period to scheduled receipt or payment of cash. The fair value of the Corporation's debt obligations is estimated based on discounted future cash flows using discount rates that reflect current market conditions for instruments with similar terms and risks. Such fair value estimates are not necessarily indicative of the amounts the Corporation might pay or receive in actual market transactions. The fair value of financial assets and liabilities were as follows:

	<u>As at December 31, 2013</u>		<u>As at December 31, 2012</u>	
	<u>Carrying Amount</u>	<u>Fair Value</u>	<u>Carrying Amount</u>	<u>Fair Value</u>
Financial Assets				
Fair Value through Profit or Loss				
Cash and short term deposits	217,942	217,942	233,773	233,773
Loans and Receivables				
Accounts receivable	142,519	142,519	112,175	112,175
Held to Maturity				
Short term investments	102,937	102,937	134,148	134,148
Long term investments	1,513,395	1,513,395	1,630,099	1,630,099
Financial Liabilities				
Other Financial Liabilities				
Accounts payable & accrued liabilities	371,694	371,694	416,144	416,144
Long term debt	17,502,565	19,694,000	14,721,871	15,233,000
Fair Value through Profit or Loss				
Preferred shares	4,360,175	4,360,175	4,252,853	4,252,853

---

**StorageVault Canada Inc.**  
**Notes to the Consolidated Financial Statements**  
For the Years Ended December 31, 2013 and 2012

---

**Note 13 - Continued**

IFRS establishes a three tier fair value hierarchy to reflect the significance of the inputs used in measuring the fair value of the Corporation's financial instruments. The three levels are:

Level 1 – This level includes assets and liabilities measured at fair market value based on unadjusted quoted prices for identical assets and liabilities in active markets that the Corporation can access on the measurement date.

Level 2 – This level includes measurements based on directly or indirectly observable inputs other than quoted prices included in Level 1. Financial instruments in this category are measured using valuation models or other standard valuation techniques that rely on observable market inputs.

Level 3 – The measurements used in this level rest on inputs that are unobservable, unavailable, or whose observable inputs do not justify the largest part of the fair value instrument.

The following table presents information on the Corporation's assets and liabilities measured at fair value and indicates the fair value hierarchy of the valuation techniques used to determine this fair value.

	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Total</u>
<b>Assets</b>				
Cash and short term deposits	\$ 217,942	-	-	\$ 219,942
Short term investments	\$ 102,937	-	-	\$ 102,937
Long term investments	\$1,513,395	-	-	\$1,513,395
<b>Liabilities</b>				
Preferred shares	-	-	\$4,360,175	\$4,360,175

Financial instruments may expose the Corporation to a number of financial risks including interest rate risk, credit risk and environmental risk.

- a) Interest rate risk – Interest rate risk arises from changes in market interest rates that may affect the fair value of future cash flows from the Corporation's financial assets or liabilities. Interest rate risk may be partially mitigated by holding both fixed and floating rate debt, or by staggering the maturities of fixed rate debt. The Corporation is exposed to interest rate risk primarily relating to its long-term debt. The Corporation will manage interest rate risk by utilizing fixed interest rates on its mortgages where possible, staggering maturities over a number of years to mitigate exposure to any single year, and by attempting to ensure access to diverse sources of funding.

There is interest rate risk associated with variable rate mortgages as interest expense is impacted by changes in the prime rate. The impact on net income if interest rates on variable rate mortgages had been 1% higher or lower for the year ended December 31, 2013 would be approximately \$99,000 (December 31, 2012 - \$36,000).

---

**StorageVault Canada Inc.**

**Notes to the Consolidated Financial Statements**

For the Years Ended December 31, 2013 and 2012

---

**Note 13 - Continued**

- b) Credit risk - Credit risk arises from the possibility that tenants may experience financial difficulty and be unable to fulfill their financial commitments to the Corporation. Credit risk in storage facilities is mitigated by restricting access by, and ultimately, seizing the property of tenants who are delinquent in payment. Risk is also mitigated as no individual tenant accounts for greater than 5% of the Corporation's overall property income.

The following table sets forth details of accounts receivable and related allowance for doubtful accounts:

	<u>December 31, 2013</u>	<u>December 31, 2012</u>
Accounts receivable under 30 days aged	\$131,206	\$111,285
Accounts receivable over 30 days aged	38,607	19,615
Allowance for doubtful accounts	<u>(27,294)</u>	<u>(18,725)</u>
	\$142,519	\$112,175

- c) Liquidity risk – Liquidity risk is the risk that the Corporation will be unable to meet its financial obligations as they fall due. The Corporation manages liquidity risk through cash flow forecasting and regular monitoring of cash requirements including anticipated investing and financing activities. Typically the Corporation ensures that it has sufficient cash or liquid investments available to meet expected operation expenses for a period of 30 days, excluding the potential impact of extreme circumstances that cannot reasonably be predicted, such as natural disasters. For the foreseeable future, the Corporation anticipates that cash flows from operations, working capital, and other sources of financing will be sufficient to meet its debt repayment obligations and will provide sufficient funding for anticipated capital expenditures. All current financial liabilities on the Consolidated Statements of Financial Position are anticipated to come due within one year of the reporting date. Maturities of long term financial liabilities are summarized in Note 10.
- d) Environmental risk – Environmental risk is inherent in the ownership of property. Various municipal, provincial and federal regulations can result in penalties or potential liabilities for remediation should hazardous materials enter the environment. The presence of hazardous substances could also impair the Corporation's ability to sell the property, or it might expose the Corporation to civil law suits. To mitigate such risk, the Corporation will obtain a recent Phase I environmental report for all material acquisitions. It also prohibits the storage of hazardous substances as a condition of the rental contract signed by tenants.

Unless otherwise noted, it is management's opinion that the Corporation is not exposed to significant currency risk.

---

## StorageVault Canada Inc.

### Notes to the Consolidated Financial Statements

For the Years Ended December 31, 2013 and 2012

---

#### 15. Related Party Transactions

During the year ended December 31, 2013, the Corporation paid total management fees of \$255,099 (December 31, 2012 - \$232,456) to Detteson Management Inc. ("Detteson"), a corporation controlled by Alan A. Simpson and Glenn E. Fradette, who are directors and officers of the Corporation. Pursuant to a management agreement, Detteson is entitled to a base management fee of \$168,000 per year commencing May 1, 2011, subject to an annual increase of 3% on May 1 of each subsequent year as well as an annual performance fee of 4% of Net Operating Income if the Corporation attains 85% or greater of its annual board-approved budgeted Net Operating Income for that fiscal year. The portion of management fees paid for the year ended December 31, 2013, for performance fee relating to the prior fiscal year was \$78,598 (December 31, 2012 - \$61,096).

During the year ended December 31, 2013, the Corporation reimbursed travel and related expenses of \$58,524 (December 31, 2012 - \$37,887) to Detteson. These expenses, which were reimbursed at cost, were undertaken exclusively for the benefit of the Corporation.

During the year ended December 31, 2013, the Corporation paid loan guarantee fees of \$8,712 (December 31, 2012 - \$8,712) to Alan A. Simpson and loan guarantee fees of \$8,712 (December 31, 2012 - \$8,712) to Glenn E. Fradette, both of whom are directors and officers of the Corporation. As a condition of the assumption of the mortgage on T. C. Mini Storage Ltd., both Alan A. Simpson and Glenn E. Fradette were required to provide personal guarantees for the entire outstanding principal balance of the mortgage. The loan guarantee fees are compensation for the provision of these guarantees, and are paid on a monthly basis at the annual rate of 0.5% of the original mortgage principal, per person.

The Corporation holds a Master Franchise from Canadian PUPS Franchises Inc. (CPFI) which provides the Corporation with the exclusive Canadian franchise rights for the development and operation of PUPS portable storage franchises throughout Canada. CPFI is a corporation controlled by Alan A. Simpson and Glenn E. Fradette, who are directors and officers of the Corporation. The Corporation pays a continuing monthly royalty of 3.5% of the gross sales in relation to the Franchise Rights for PUPS and purchases storage containers and certain PUPS related equipment from CPFI. During the year ended December 31, 2013, the Corporation paid \$86,305 (December 31, 2012 - \$70,759) for royalties and \$840,663 (December 31, 2012 - \$806,959) for storage containers and other equipment under the Master Franchise Agreement.

During the year ended December 31, 2009, the Corporation issued \$320,000 of convertible, unsecured debentures of which \$210,000 was issued to officers, directors and spouses of directors of the Corporation. During the year ended December 31, 2013, interest paid on the debentures to officers, directors and spouses of directors of the Corporation was \$14,020 (December 31, 2012 - \$19,950). The debentures were redeemed in full on July 26, 2013.

Included in accounts payable and accrued liabilities, relating to the previously noted transactions, at December 31, 2013 was \$111,920 (December 31, 2012 - \$72,210) payable to CPFI and \$53,823 (December 31, 2012 - \$2,570) payable to Detteson.

---

## **16. Capital Risk Management**

The Corporation's objectives when managing capital are to safeguard the Corporation's ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders. The Corporation defines capital as shareholders' equity excluding contributed surplus, and long term debt. The Corporation manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Corporation may attempt to issue new shares, issue new debt, acquire or dispose of assets, and adjust the amount of cash and short term deposits. The Board of Directors does not establish a quantitative return on capital criteria, but rather promotes year over year sustainable growth.

On an ongoing basis, the Corporation reviews and assesses its capital structure. The Corporation determines the appropriate mortgage debt to be placed on properties at the time a particular property is acquired or when an existing mortgage financing matures. Consideration is given to various factors including, but not limited to, interest rates, financing costs, the term of the mortgage and the strength of cash flow arising from the underlying asset. Mortgage debt is usually only secured by the underlying asset. The Corporation monitors its capital using a debt to gross book value ratio. Debt includes mortgages, term debt and subordinated debt. Gross book value of assets is total assets plus accumulated amortization of income properties. The Corporation's debt to gross book value ratio at December 31, 2013 is 51.6% (December 31, 2012 – 54.1%).

Except for the debt covenants described in Note 10, the Corporation is not subject to any externally imposed capital requirements.

#### 17. Segmented Information

The Corporation operates three reportable business segments. Each segment is a component of the Corporation for which separate discrete financial information is available for evaluation by the chief decision makers of the Corporation. The reportable segments are defined by their product offering, being Fixed Self Storage, Portable Storage and Equipment Sales

- Fixed Self Storage – often called “mini-storage”, this involves the customer renting a secure storage space in a building maintained by the Corporation and transporting his/her possessions to the Corporation’s facilities for short or long term storage. The Corporation’s facilities range from 135 to over 500 rental units. Fixed Self Storage facilities may also include space for storing vehicles, and/or small commercial operations.
- Portable Storage – this segment involves delivering a storage container to the tenant’s residence or place of business using a specially modified truck. The storage containers range from 2 meters to 6 meters in length. The tenant can opt to keep the storage container at his/her location for the duration of the tenancy or have it moved to another location for further storage.
- Equipment Sales – involves the purchase and resale of equipment used in the either the Fixed Self Storage or Portable Storage industries.

The Corporation evaluates performance and allocates resources based on earnings before interest, taxes, depreciation, amortization and share based compensation. The accounting policies for the business segments are the same as those described in Note 3 – Accounting Policies. Corporate costs are not allocated to the segments and are shown separately below.

## StorageVault Canada Inc.

### Notes to the Consolidated Financial Statements

For the Years Ended December 31, 2013 and 2012

---

#### 18. Operating Lease Commitment

The Corporation leases the land in Winnipeg, MB on which its Kenaston Self Storage buildings are situated. The lease does not contain any contingent rent clauses. It does not include any provisions for transfer of title, nor does the Corporation participate in the residual value of the land. Therefore, this lease is considered an operating lease as the risk and reward of ownership of the land remains with the landlord. The lease expires in 2027 with up to 20 years of renewals at the option of the Corporation after that time.

The future minimum lease payments, excluding incidental costs for which the Corporation is responsible, are as follows:

Less than one year	\$ 59,535
Between one and five years	249,551
More than five years	<u>532,392</u>
	\$ 841,478

During the year ended December 31, 2013, the Corporation recognized as an expense \$59,535 (December 31, 2012 - \$59,535) in operating lease payments.

#### 19. Subsequent Events

On February 25, 2014, the Corporation completed its non-brokered private placement of a combination of half warrant units (each, a "Half Warrant Unit") and full warrant units (each, a "Full Warrant Unit") at a price of \$0.30 per either a Half Warrant Unit or a Full Warrant Unit for aggregate gross proceeds of \$1,000,000 (3,333,333 units). A total of \$850,000 of Full Warrant Units (2,833,334 units) and \$150,000 of Half Warrant Units (499,999 units) were issued. Each Half Warrant Unit is comprised of one common share in the share capital of the Corporation and one-half (1/2) of one common share purchase warrant with each whole \$0.35 Warrant being exercisable for four years from the closing of the offering into one common share at an exercise price of \$0.35 per share. Each Full Warrant Unit is comprised of one common share and one full common share purchase warrant with each \$0.37 Warrant being exercisable for four years from the closing of the Offering into one Common Share at an exercise price of \$0.37 per share.

On March 26, 2014, the Corporation completed the re-financing of a fixed rate mortgage on a property in Winnipeg, MB in the amount of \$3,996,141; of a fixed rate mortgage on a property in Parksville, BC in the amount of \$183,910; and on a floating rate mortgage on a property in Saskatoon, SK in the amount of \$665,550. All of these locations were re-financed under the \$20,000,000 Facility 1 credit facility described in Note 10.
